

This architectural drawing illustrates a bridge project over a stream, featuring both plan and elevation views. The plan view at the top shows the bridge's layout, including the stream bed, bridge piers, and surrounding terrain with elevation points. Key features include:

- Stream and Bridge Structure:** The stream bed is marked with a dashed line and labeled 'STÁVAJÍCÍ DNO POTOKA'. The bridge structure consists of a central span supported by two piers, with abutments on either side. The bridge deck is labeled 'DŘEVĚNÉ ZABRADLÍ' (wooden railing).
- Structural Details:** The bridge deck is supported by 'DŘEVĚNÉ PODÉLNÍKY' (wooden longitudinal beams) and 'OCELOVÉ PŘÍČNÍKY' (steel crossbeams). The bridge piers are labeled 'DŘEVĚNÉ PÍLÍČKY' (wooden piles).
- Access and Surroundings:** The drawing shows access roads, including a 'NOVÝ CHODNÍK S BETONOVOU OBRUBOU' (new sidewalk with concrete curb) and a 'DŘEVĚNÝ CHODNÍK' (wooden sidewalk). A 'DŘEVĚNÝ NOSTNÍK 100x700' (wooden support beam) is also indicated.
- Elevation and Grading:** The elevation view at the bottom shows the bridge's profile, including the 'STÁVAJÍCÍ KAMENNÁ OPĚRNÁ ZĚď' (existing stone abutment wall) and the 'STÁVAJÍCÍ DNO POTOKA' (existing stream bed). The bridge deck is shown with a 5.70% slope.
