classDiagram
 class color {
 color
 color
 }
 class Scp {
 color
 color
 }
 color <|-- Scp

```

The diagram illustrates the inheritance of the `color` attribute and method from the `color` class to the `Scp` class. The `color` class has a `color` attribute and a `color` method. The `Scp` class inherits from `color` and has a `color` attribute and a `color` method. The `color` attribute is inherited from the `color` class, and the `color` method is inherited from the `color` class. The `color` attribute is inherited from the `color` class, and the `color` method is inherited from the `color` class.
