### Evaluation process description:

The evaluation of the submitted bids was performed in accordance with the rules defined in the Tender Documentation and in accordance with the procedure established within Section 115 of the Act. The bids were evaluated according to the following criteria:

1. Total bid price excl. VAT in CZK - weight 76 %
2. Length of warranty period in months - weight 24 %

Within the evaluation *criterion 1.*, the Contracting Authority evaluated the total bid price in CZK excl. VAT, processed in accordance with Section 5 of the Tender Documentation. The number of points awarded has been determined according to the formula below:

$$\text{Number of points} = \frac{\text{Lowest bid price within the evaluated bids}}{\text{Bid price of the evaluated bid}} \cdot 76$$

Within the evaluation *criterion 2.*, the Contracting Authority evaluated the length of the warranty period. The minimum length of the warranty period was set at 12 months (i.e. a bid with a shorter warranty period would be rejected and excluded from the procurement procedure), the maximum evaluated length of the warranty period was set at 36 months (bids with a longer warranty period would have been evaluated as if the offered length of the warranty period was 36 months).

The evaluated bid received a point for each month by which the length of the warranty offered by the bidder exceeds the minimum required warranty period, which was set at 12 months.

The number of points achieved within the above criteria was rounded to 2 decimal places. The resulting order of the bidders within this part of the Public Contract was created by ranking the bids according to the total number of points achieved from the highest to the lowest. The bid with the highest number of points was evaluated as the most advantageous.
