

Answers to the questions of participants within preliminary market consultations

Contract: „Purchase of public transport buses – Jablonecká dopravní“

Contracting authority: Jablonecká dopravní a.s., Company Identification Number (ID): 06873031, with its registered office at Jablonec nad Nisou, Mírové nám. 3100/19, 466 01

Question No. 1:

May I ask you to send more detailed technical specifications with respect to every particular type of bus? It is not possible to certainly determine whether the buses shall be low-floor in full (I presume so), or just with partial low floor from the published documents. Further important parameters are required capacity, type and number of doors, etc.

Answer to the question No. 1:

Buses shall be **fully low-floored (buses with low floor)**. Required buses are city buses suitable for purposes of running public transport within the city.

Number of doors of each type of buses is published at page 1 of the Call for preliminary market consultations in respect to each type of demanded buses as follows:

- (i) bus up to 13m long – 3 doors
- (ii) bus up to 10,7m long – 3 doors
- (iii) bus up to 9,5m long – 3 doors
- (iv) bus up to 7,5m long – 2 doors

Required capacity of buses based on a type of demanded buses is following:

- (i) bus up to 13m long – minimum of 90 passengers
- (ii) bus up to 10,7m long – minimum of 70 passengers
- (iii) bus up to 9,5m long – minimum of 60 passengers
- (iv) bus up to 7,5m long – minimum of 30 passengers
