

POHLED ZADNÍ POŽÁRNÍ ZBRŮJNICE

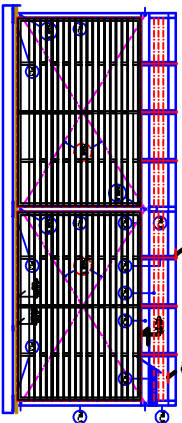

POHLED ZADNÍ POŽÁRNÍ ZBRŮJNICE

- Diagram illustrating a chemical reaction mechanism:

 - Starting Material:** A substituted benzene ring with a methyl group and a bromine atom.
 - Step 1:** Reaction with NaOH to form a phenoxide intermediate.
 - Step 2:** Reaction with a carbonyl compound to form a new intermediate.
 - Step 3:** Rearrangement to the final product, which is a substituted benzene ring with a different substitution pattern.

POHLED KONSTRUKCE TERASA
